

“Healthy Hearts and Parts”

SEMI-ANNUAL JUNIOR HEALTH SCREEN CONSENT FORM

At Providence Animal Hospital, our doctor(s) and staff highly recommend that all of our patients get a general blood work panel done *at least annually*, starting at the age of **1 ½ years old**. This allows us to screen for physical conditions that may not be evident on a physical exam.

The following conditions are examples of **serious conditions** that can be screened for in patients whose owners allow us to complete the recommended bloodwork.

- **Liver Disease**
- **Diabetes**
- **Kidney Disease**
- **Anemia**
- **Infection**
- **Dehydration**

It is important to remember that pet’s age much more rapidly than people. An annual bloodwork screen for your pet is equivalent to a person getting bloodwork every 7 to 9 years. Our Doctor(s) feel that wellness bloodwork is both **necessary and important** for all pets...even pets in *apparent* good health.

Your commitment to checking these important “parts” will be matched by a FREE “heart” check (EKG or electronic blood pressure check) by our doctor.

The cost for a **semi-annual Junior wellness bloodwork screen** is **only \$95.00**

_____ **YES!** Please complete the recommended bloodwork screen for my pet.

_____ **NO !** I decline the recommended bloodwork screen for my pet.
